Prior Art Rejections

- 1) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 2) Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Bergman et al (US-4,340,836). See column 3, lines 41-44.

- 3) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- 4) Claims 3-4 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Bergman et al in view of Petro et al (US-3,822,455). It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to form the wire coil 12 of Bergman et al by severing a winding with a laser to form beaded coil ends as taught by Petro et al since the beaded ends facilitate handling and welding of the coil to the tungsten shank.
